Ice cube: in BFDi 3 they are killing her from 6:29-6:41 times in that's 12 seconds; well on screen on screen they kill her 7 times in 3 seconds that's 7/3 pers second over 12 seconds that's 84/3 or 28 times total including the other 7 that's 35 times In bfdi 8 the end section where she dies 61 times was very hard to count so I split it up into sections I counted each section and jotted it down this way I could use finger counting insisted of tally marks which is much easier also it was running the whole time between BFDI8 and 9 a 31 day gap blocky's contraption kill 8/5 icys per second 86400 seconds in a day that's 4285440 deaths including the 41 seconds at the beginning that's 65 more deaths if you don't think that's right carry says ice cube dies thousands of times 13:35 https://www.youtube.com/watch?v=f6DWUoDsndI but wait there's more a lot more death pact is going to hate this in TPOT 2 ice cube died 11 times in just 3 seconds that's 11/3 a second this countries until 26:36 it started in 23:34 thats 447 deaths but oh were not done TPot 5 is here ice cube dies 7 times in 4 seconds from 11:34 she continues 15:03 365 deaths

Nonexisty didn't die in BFDI 18 do to announcer missing him

Fiery: in BFDI 22 the thing kill at a rate of 9/4 per second that's 6 extra for flower and spongy and 2 more after spongy's death

Flower in BFDI announcer says fiery died the most meaning when flower fell down the bridge she didn't die

In BFDIA1 the contestants that were crushed don't die as eraser can still read the rules

Puffball: she was recovered in BFDIA 5a even though she didn't die
Fiery: he was recovered in BFDIA 5a even though he didn't die
Nickel: he was recovered in BFDIA 5a even though he didn't die
Match: she was recovered in BFDIA 5a even though she didn't die
Ice cube: she was recovered in BFDIA 5a even though she didn't die
Spongey: she was recovered in BFDIA 5a even though she didn't die
Rocky: she was recovered in BFDIA 5a even though she didn't die

BFDIA 5b it is possible to win without dying so no one dies in 5b

BFDIA 5c oh no.. well bubble says the goky canal is over 500 miles wide being that the real life erie canal is only 200 ft wide at its best we'll go with 500 miles now how fast is the freesmart supervan going according to the announcer his vat is 10 ft deep so we'll calculate based off of that pensil is 3.34 meters tall
https://www.youtube.com/watch?v=dvnuiYnbJfk&t=27s

The freesmart super van is 3 and ⅜ tall

so the freesmart super van is 11.2725 or 12.32775591 ft the freesmart super van in 1 second traveled almost accesskey 1 freesmart supervan or 12.32775591 ft per second or 8.4052881204545 mph between 9:01 to 9:57 the die 7 times or 1/56 per second per character being that the freesmart super van is going to reach yoyoland in 59.4863605905 hours or 214150.8981258 seconds and we get 3824 death per character

o

Tennis ball: In BFDIA 6 he dies and then says alright I'm canonically supposed to be dead right now but I'm coming back to life to say golfball you've blurted that line so many heckin times I wanna rip my ears off okay back to being dead now does this count as he did die twice I will count it but if you think he only died once here just mentally drop the number down by one he also was recovered in BFDIA 5a even though she didn't die

Ruby: when she shatters is that a death if she can be reassembled and still be alive like in BFDIA 8 and 11 I won't count it but she has shattered 6 times one of witch was when the lol was crushed I'm also counting when she recovered herself even though she was partially alive do to the yoyolite she was recovered in BFDIA 5a even though she didn't die although this was probably do to a bomby explosion which might of just shattered her so I don't count it

Bombay: I don't think evil leafy killed him BFDIA 12 as he ate people and they survived and went into flower and both times they survived

Clock: died once off camera between BFB 10 and 11

Pie and bombey die in the TPOT intro I'll count it once but never again in my headcanon the recorded it once and then kept on reusing it

No the death in black holes dream doesn't count nor in pens dream or even book's

Intro: Hey guys DYC here today back with another banger of a video and today guys I'm going to be figuring out how many times each BFDI character has died yes I could just use the wiki but the wiki is kinda dumb according to it people died before the MRC was introduced and they don't have acurite numbers for how many times free smart died while crossing the goiky canal there are others which is why I'm not trusting the wiki *text displays "any character I forgot to mention is only because they got 0* and no ice cube and ice cube jr. are not different characters" also ties are broken by whatever order they appeared in my script so no rhyme or reason for it.

Fiery jr. 0 Fiery jr. doesn't do anything seriously name one thing he did yep that's right dying is also a thing so he doesn't do any of that

Stapy 0 staplers are hard to break and he didn't last long enough to be broken

Liy 0 same as stapy

2 0 dying sucks it's painful and you haft to wait to be recovered but 2 has unlimited power and makes himself not die. Also he’s a host so he doesn’t participate in any dangerous challenges.

Flower speaker box 0 she appeared in only a few episodes also a host

Braclety 0 she just got out too early sad though ice cube dies a lot he dies never

Nonexisty 0 no he didn’t die in the LOL ruby has been shown to be able to tell where he is and she said that the announcer missed him

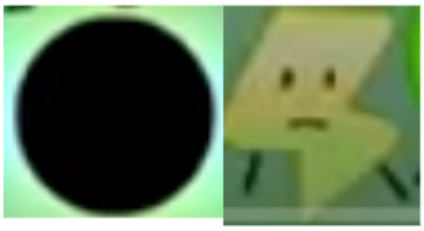
4 0 host, also no one could kill him

Loser 1 finally a death *death pack comes out from the side of the screen* I mean oh no a death *pillow* um anyway it's a good time to explain the graph it shoes deaths great spelling by me in chronological order right now there's just one thin line showing losers one death but later it will hold some value

Firey speaker box 1 host but not even one for a whole season but still managed to die? He’s one of only 2 like that

Profily 1 profily is one of the newest editions no wonder he doesn’t die much

Black hole 1 How did black hole die, you might ask? By being killed by 4 in BFB 5 of course. Now this did get me wondering how long would it take black hole to die via hawking radiation? For this and all other measurements we’ll be using the announcer’s vat being 10 ft wide being that all other distance measurements in BFDI are estimates unclear or in golf ball imagination. someone already calculated the height for everyone using this method except for puffball and black hole but black-hole is really close to lightning in terms of height



so we’re going to go with that that gives us 15,444,900,000,000,000,000,000,000,000,000,000,000,000,000,000,000,000,000,000 years 15 sexdecillon years 444 sepdecillon 900 quindecillon year s he also out weights the earth 36.6428x and has 14,099,600,000,000,000x 14 quadrillion the gravity at the surface ya. Thanks

vitor for the calculator
https://www.vttoth.com/CMS/physics-notes/311-hawking-radiation-calculator

Puffball speaker box 1 same as fiery speaker box but seriously dying as a host that hasn't even hosted for a full season is very hard, hard to believe it happened twice

Dora 1 name 1 thing about Dora that's right she is one of the worst characters in BFDI her only death was in the LOL

Saw 1 LOL

Roboty 1 LOL also I have a bone to pick with Roboty why does he speak morse code a code made by humans to be sent by humans to be reserved by humans to be decoded by humans to be understood by humans to be responded to by humans after being translated by humans also roboty doesn't speak good morse code in morse code there is a silence between letters witch roboty doesn't seem to do or is too slight for me to notice this makes translation basically impossible so now what language should roboty speak if not morse code? Binary 01101111 01100100 01101001 01101111 01110101 01110011 01101100 01111001

Puffball 2 At first I was surprised I thought she would be higher on the list but then I thought about it and she got eliminated in BFDIA really early and in TPOT fairly early as well also how do you kill a puffball? Also also she was recovered in BFDIA 5a even though people have survived bomby's explosion before.

Cloudy 2 clouds are hard to kill being that there gas unless your 4 or the sun

Tree 2 he's preventing his own death and doing a good job 2 is low

Eraser 2 I genuinely have no idea how he's this low except that he wan't in BFDIA

Evil leafy 2 The LOL strikes again also he's supposed to be fairly hard to kill because you wouldn't be scared of a thing you could easily kill now would you

X 2 Both by 4 with this you might wonder why their friends because no one cares about death *death pact and pillow* most people don't care about death in this series also X wouldn't know he equals 7 without 4's help

8-ball 2 he is the only person to be killed by both the moon and the sun 8-balls are hard to break even cheaply made plastic is strong if its thick enough and 3.02 m of pure plastic is enough

Eggy pillow 2 wait which one got 2 O.K pillow got 2 eggy will come later

Pillow 2 for someone that loves death she sure doesn't die a lot of course LOL strikes here again and the other one was in BFB 1 both of which was before she started killing people I guess the intimidation caused people to not kill her

Basketball 2 ah yes the golf ball wannabe It makes sense that she wants to copy golf ball as basketball is a bad sport. Golfball has an underground factory she gets a above ground one golf bosses her team around she does too all that's left is getting a tennis ball stand in (robot flower

most likely) and their the same person pillow ends at 6:20:25 gaty starts at

6:35:23

Gaty 3 oh right this video is about death I probably should've made that joke after the roboty one too huh welp I'll do it after I do any side tangent not related to death

Foldy 3 oh right this is a video about death now that's way funnier than going back to roboty and changing it because I know you're going to go comment that and please do comment "I love this video Daniel Bleep this is the best thing to ever grace my screen" is a great comment to boost engagement and hopefully the youtube algorithm wont get suspicious that I'm telling you to comment you'll also get 20 DYC points!

Marker 3 oh right this is a video about death wait I should probably talk about foldys death

Foldy 3 I'm surprised foldy isn't higher being paper and fiery fiery jr. ice cube tear drop goiky canal gelatins ice needys the world largest oven lava and the sun all being easily capable of killing foldy but dying to water is fierys thing and dying to fire is leafys thing so foldy is left with 3 good for death pact I guess

Marker 3 preventing his own death OK and I mean O.K 3 the exact median but he's still not as good tree

Grassy 3 ah yes the better version of David died the same amount achickly we'll see him pretty soon I'm sorry for spoiling David's death count it's like spoiling chapter 1 of a book no one cares but I am tying to script this so that spoilings don't happen and this is a good time to mention it.

Lightning 3 oh right this is a video about death lightning only died once after she started caring black hole is the best in this regard as he died 0 times after he started caring also I find it weird that lightning a collection of pure force and photons can dye like every other character.

Remote 3 she is like marker preventing her death except unlike pie black hole tree or marker she doesn’t try that hard

)

Bell 3 metal is hard to break so bell is naturally hard to kill

David 3 he gets eliminated fairly quickly but in the episode recission he died twice pushing his total up

Naily 3 metal hard to kill my watch time is going to be so bad with scripting like that I know that saying that is probably going to jinx it. Is saying it's going to jinx it going to jinx it? Hopefully not but we will just haft to wait and see. Judging by that you're still watching I’ll say it didn’t or you're just an outlier.

Robot flower 3 oh right this is a video about death anyway if it wasn’t for basketball this number would be higher constantly fixing her. buttering her up to be her vision of tennis ball and take over golf ball as the bossy bot

Blocky 3 oh right this is a video about death blocky’s total is diminished by not being in BFDIA and being fairly durable

Lollipop 3 (shooooooooooooot I don’t have anything to say about lollipop’s deaths um need a way out) now is a good time to like subscribe share ring the bell and do everything every youtuber does at the end of all their videos (their they probably forgot about lollipop by now)

Eggy 3 weird eggs are fragile. I expected more but eggy didn’t do much outside of being a loser/winner follower

Needy 4 metal but been around since BFDI

Winner 4 wow se’s only been around since TPOT 1 but I guess 3 deaths in TPOT 5 didn’t help

Taggy 4 wow he’s only been around since TPOT 1 but he is on pillows team

Woody 4 he catches on fire a lot and no I don’t count the the times blocky punts him into space

Yellow face 4 faces are fairly fragile fakes a fair film phrase for the flax face

Taco 4 she did last a long time in BFB

Snowball 4 snow can easily melt but snowball is mostly killed the normal way

Pen 4 ya I got nothing on pens deaths accept that he's another death pact member

TV 5 TV's are very easy to break also why is TV battling for BFDI when he clearly has BFDI in him why is anyone when they can just watch it on TV? *paws* That puts the whole of BFB in a new light especially the end

Tear drop 5 oh right this is a video about death teardrop has been around since the beginning and doesn't get eliminated often when she did get eliminated very early in BFDIA but that's made up for by being in TPOT and post split BFB

Coiny 5 probably should of used my lollipop out in coiny because I just have nothing I guess I can say that popularity has had a bigger effect than I thought and coiny is pretty popular

Fanny 5 not doing well on preventing his own death but with TPOT 10 thats really fitting

Pie 5 dies in the TPOT intro so do I count it once but never again or for each episode of TPOT? I'll count it once because in my headcanon the recorded it once and then kept on reusing it other than that he explodes a lot and a death pact member

Purple face 5 wow I am very surprised by this one he isn't in very many episodes and it's not like buble where he die5 s in almost every one

Clock 6 he died once off camera between BFB 10 and 11 and his teammates forgot about him LOL

Cake 6 he gets squished a lot couple that with also being on pillows team

Nickel 6 he was recovered in BFDIA 5a even though people have survived bomby's explosion before he's also on pillows team

Balloony 6 balloons easily go *pop* but he wasn't in many BFDI episodes

Donut 6 ya I have no how he got so many but half of them came from TPOT 9 and 10 so maybe just those two pushed the number up

Barf bag 7 if she falls over all of her barf comes out and that's the end of her she must be so worried while walking

Gelatin 9 really no 8 saw must be sad especially since his entry was like ⅓ a second long “LOL” also gelatin is soft and easy to break.

Pin 9 I’ll put a pin in this one and come back to it later

Golf ball 9 have you ever played with a real golf ball? They are so bouncy even bouncer than a tennis ball but in the show Tennis ball seems to be the bouncier one

Fries 9 Ohhhhhh right this video is about death fries isn’t the fries inside him but the cardboard that the fries are in and a fries containers aren’t durable

Pin 9 (now libless) Oh it's later can I put another pin in this one and come back to it later because the pun worked so well the first time!

Bottle 11 glass and death pact member

Tennis ball 14 doesn’t get eliminated often in fact he hasn’t been eliminated by viewer votes once also In BFDIA 6 he dies and then says “alright I’m canonically supposed to be dead right now but I’m coming back to life to say golfball you’ve blurted that line so many heckin times I wanna rip my ears off okay back to being dead now” does this count as 2 or 1 deaths I will count it as 2 but if you think he only died once here just mentally drop the number down by one he also also was recovered in BFDIA 5a even though she didn’t die

Rocky 14 a rock that's like the most durable thing there is! How is she this high! she was recovered in BFDIA 5a even though she didn’t die

bombey 20 just like pie he explodes and just like pie he dies in the TPOT intro and just like pie I’ll count it once also I don’t think evil leafy killed him BFDIA 12 as she ate people and they survived and went into flower and both times they survived also also pillow’s team

Spongy 28 In BFDI 22 I counted 21 deaths including the part where he falls over and over really fast in that scene spongey dies at a rate of 9/4 per second that's 6 extra for him

Flower 31 flower was also in that episode and in that same scene in BFDI 23 announcer says fiery died the most meaning when flower fell down the bridge she didn’t die

Pin 9 (now faceless) Oh it's later can I put a 3rd pin in this one and come back to it later because the pun worked so well the 2ed time!

Leafy 36 being ”””””””

Book 1283 minus the outlier she has 9 deaths pillow team

Bubble:1,386 minus the outlier she has 112 deaths the 1st death was bubble's in BFDI 1a the only death that episode she is also the poster child for death in this show even though she only came in 2ed

Some of you probably saw this coming. Some of you have been keeping track of what characters I've gone over and know who's number 1 but I guarantee that none of you know by how much she's in first so by how many? A.1-10 B.10-100 C.100-1,000 D.1,000-10,000 E.10,000-100,000 F.100,000-1,000,000 G.1,000,000-10,000,000 so without further ado but this is it #1 is

Pin 9 (now small) Oh, O.K. pin first more suspense pin has been around since the beginning and only been eliminated once that's really about it

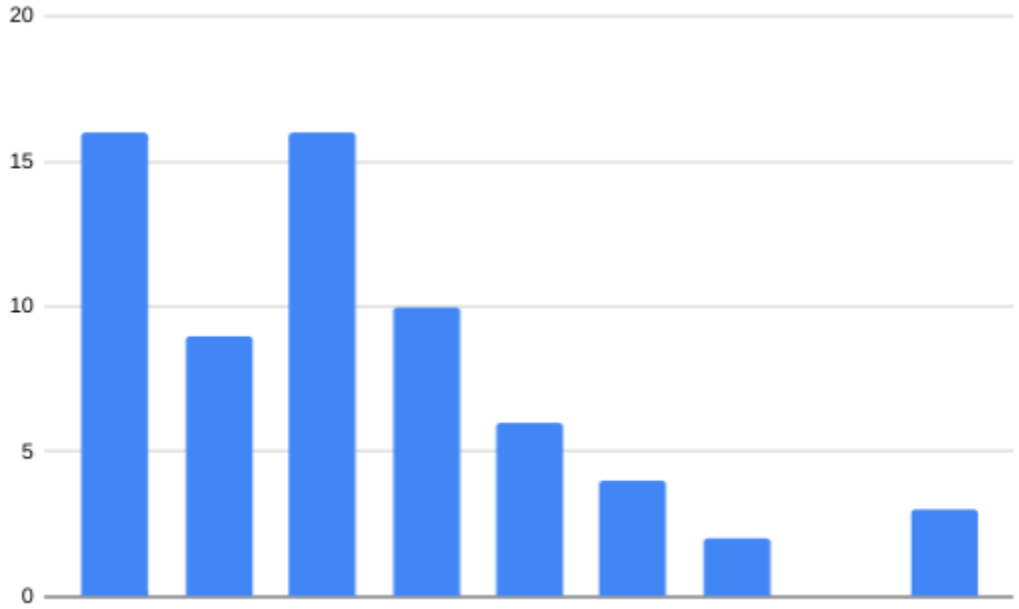
Icecube: 4287751 did you guess G? but Yes you read that correctly 4,287,751 deaths first the parts that aren't in the millions death pact is going to hate this she was recovered in BFDIA 5a even though she didn't die in BFDi 3 they are killing her from 6:29-6:41 that's 12 seconds; while on screen on screen they kill her 7 times in 3 seconds that's 7/3 pers second over 12 seconds that's 84/3 or 28 times total including the other 7 that's 35 times in TPOT 2 ice cube died 11 times in just 3 seconds that's 11/3 a second this countries until 26:36 it started in 23:34 thats 447 deaths but oh were not done TPot 5 is here ice cube dies 7 times in 4 seconds from 11:34 she continues 15:03 365 deaths plus she crossed the goiky canal thats 2311 deaths minus the crossing of the goiky canal that's 1037

Now for the 4,285,440 deaths not included

In bfdi 8 the end section where she dies 61 times was very hard to count so I split it up into sections I counted each section and jotted it down this way I could use finger counting insisted of tally marks which is much easier also it was running the whole time between BFDI8 and 9 a 31 day gap blocky's contraption kill 8/5 icys per second 86,400 seconds in a day that's 4,285,440 deaths including the 41 seconds at the beginning that's 65 more deaths if you don't think that's right carry says ice cube dies thousands of times 13:35 https://www.youtube.com/watch?v=f6DWUoDsndI

So I know what your all wondering this is a long list of numbers spanning multiple orders of magnitude so it's time to play the best mathematics gameshow does it follow benford's law so going into this I thought no for the most part only 2 orders of magnitude not enough and ehhh it

has a peak in 3 but otherwise it fits



Anyway a few more clarifications
No the death in black holes dream doesn’t count nor in pens dream or even book’s
In BFDIA1 the contestants that were crushed don't die as eraser can still read the rules
BFDIA 5b it is possible to win without dying so no one dies in 5b
This is accurate up to BFDIA 12

Other than that the google sheet is in the description do whatever with all the numbers

Golf ball
